

Zennio[®]
Passion for KNX innovation

FLAGSHIP PROJECTS

Zennio is a global specialist in manufacturing KNX automation solutions. Our modern and functional solutions specially designed for hotels, homes and buildings, have been installed in numerous flagship projects nationally and internationally. In each project Zennio has obtained sophisticated high performance properties which have helped to reduce energy consumption dramatically, and added a unique and exclusive style in each space through exceptional fully customizable touch panels.

Home References

Zennio's automation solutions have been provided with to builders and constructors, transforming drastically homes into smart homes, and adding high value to homeowners, as well as converting home automation in a powerful sales tool for builders to differentiate from competence. Our modern automation solutions and functional designs for homes have enhanced remarkably the well-being of owners, reduced energy consumption, increased saving costs, and obtained sophisticated high performance homes.
